

We are pleased to report pursuant to the attached memo from the City Manager that the vote on the Resolution to increase the Sewer rates for condominiums has been pulled off the December 6<sup>th</sup> City Council Agenda.

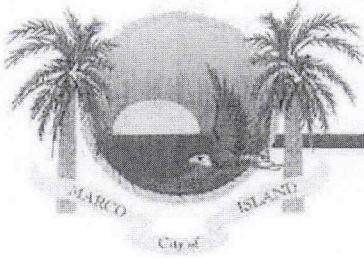

This is a very positive step and it appears that the Council will now wait until the Cost of Service Study is completed before making a decision on what the appropriate rate structures for both Water and Sewer should be.

We encourage everyone to have your Board of Directors to write letters to the City Council thanking them for this decision.

Thank You,

Al Diaz

City Directors

**SUBJECT: Regarding proposed agenda item Business 3 (e) resolution – utility sewer rate structure change FY 2011”**

In recognition of the disparate information regarding data supporting utility rate discussion to be presented at the December 6, 2010 council meeting;

and since on December 8, 2010, the scoring committee (which includes four councilmen) will be selecting the firm to conduct the cost of service (COS) study;

I have consulted with the Chair of city council and the Chair of the COS subcommittee and have decided to pull this business item from the December 6, 2010 agenda pending completion of the COS study.
